Cinema is Coming Home

"Having a technology that can really adapt to, and to create that cinema experience at home is really what any creator would want."

MICHAEL LASKER, VFX Supervisor
on *Spider-Man: Across the Spider-Verse*

"I was very impressed. I thought that the dialog was very clear. You could hear all the nuances of every little detail that we had placed in there. You could hear really well. It wasn't getting muffled, it wasn't getting lost. It was all there. The subs were amazing."

ERIN OAKLEY, Supervising Sound Editor
on *Gran Turismo: Based on a True Story*

Cinematic Picture & Sound

With over 60 years of TV innovation coupled with expertise in every aspect of filmmaking, Sony's TVs replicate the movie theatre experience right in your home, by delivering picture and sound quality beyond what conventional TVs can.

Studio Calibrated

Dive into cinema-like visuals at home. With automatic Studio Calibrated modes jointly designed by Sony and the world's top streaming services, watch movies, shows or even live sports the way filmmakers and broadcasters intended.^{1,2,3}

Films, TV And Gaming At Their Best

Our soundbars and home theatre solutions make high-quality, cinematic surround sound more accessible than ever.

The BRAVIA™ Acoustic Center Sync or S-Center speaker input allows you to connect your compatible Sony soundbar/audio system to the TV for enhanced audio playback using the TV as a center channel speaker in a multi-channel setup.

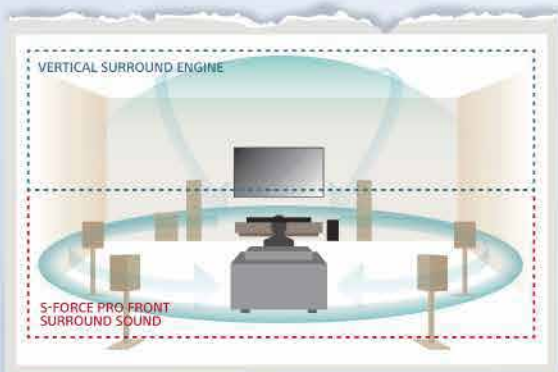

360 SPATIAL SOUND MAPPING

Feel sound from every direction and distance, even beyond the boundaries of your room with Sony's revolutionary 360 Spatial Sound Mapping technology.

360 Spatial Sound Mapping uses Sony's original distance measurement technology to calculate the distance between speakers and from the speakers to the ceiling, before combining it with physical sound field reproduction technology.

The system uses built-in microphones to measure the relative positions of each speaker and reproduce sound wave fronts from up to twelve phantom speakers (simulated sound sources) that are assumed to exist somewhere outside of the physical speakers. As the simulated speakers exist beyond the actual speakers, they can make you feel as if you are in an extremely wide and expansive space that seems to extend beyond the room.

Re-creating the Dolby Atmos® experience with Sony's proprietary technologies

With development of the unique Digital signal Processing technologies, the Dolby Atmos® sound field can be produced in your own home with just a single slim sound bar and subwoofer.

VERTICAL SURROUND ENGINE

Vertical Surround Engine* - Sony's latest surround technology lets you enjoy the thrill of Dolby Atmos® from a single slim unit.

S-FORCE PRO FRONT SURROUND

S-Force PRO Front Surround with wavefront technology delivers a wide horizontal surround sound field even without rear speakers.
